

Is TIP working in Clermont County?

With support from TIP, youth are making decisions for better physical and mental healthcare.

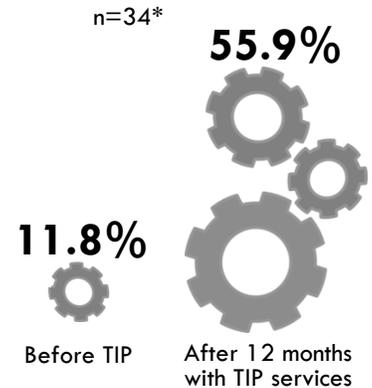

After one year with TIP services:

70.7%

of youth now have their own regular doctor. This is important because having a regular doctor can help prevent illnesses from becoming long-lasting, serious health issues.

TIP is helping youth find a single service provider for all mental healthcare needs.

Greater Cincinnati Behavioral Health helps provide a one-stop service for better access and connections to community resources that can assist youth with emotional and behavioral health challenges now and throughout adulthood.

TIP is helping to make independent living a reality for youth in the community.

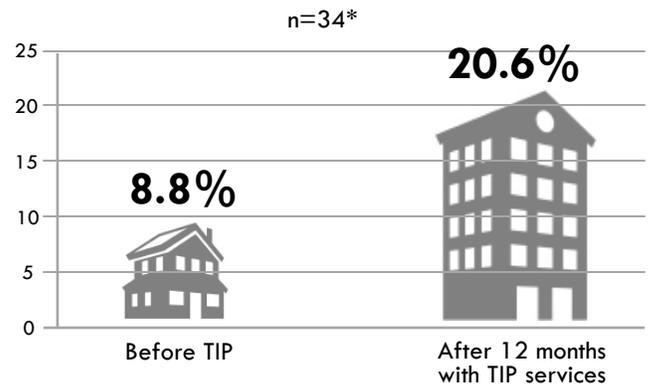

Sally's Story

Previously, Sally and her mother questioned whether she would be **able to live on her own** due to her extreme anxiety and constant need of support.

Her Transition Facilitator (TF) worked with her on her goals of **managing her anxiety and learning problem solving techniques**. She began to put in job applications to several places with support from her TF.

At times the process seemed never-ending, but she finally **moved into her own apartment** in May and has been doing well. She **met some friends**, sees her mom every weekend, and is **living independently**.

With assistance from TIP, more and more youth are **living in their own apartment**.

What can I do as a parent or a community member?

Help us spread the word about the great work that TIP is doing for our youth and families and about everything the FAST TRAC System of Care is doing in our community!

- Pass this information on to family members, neighbors, co-workers, and even your local Trustees, Commissioners, Representatives or Senator! Remember, **FAST TRAC** is funded by a grant that **will end this year. Services will not continue at this level unless your community supports them!**
- Join a FAST TRAC Workgroup to **share your perspective as a youth or family member in our community.**
Call: 732-5400
